SONTAY
WELLSense

MADE IN BRITAIN

Smarter insight
for healthier spaces

The WELLSense Space sensor provides real-time insights into key indoor environmental conditions, helping you create spaces that are healthier, more comfortable and more productive.

HOUSING OPTION

KEY FEATURES

Monitor 6 key parameters to comply with WELL and Reset Standards.

Modern, compact and stylish design to suit all buildings.

Easy mounting and protection before final fix.

APPLICATIONS

OFFICES
Create productive, healthy workspaces.

MEETING ROOMS
Focused meetings without tiring.

SCHOOLS
Supporting the welfare of the next generation.

HEALTH CARE
Provide patient care and comfort.

RETAIL
Create comfortable spaces that perform.

COMMUNICATION

Seamless integration via Modbus and BACnet.

Modbus BACnet

SONTAY WELLSense

MADE IN BRITAIN

Powerful monitoring for better air quality

COMING SOON

The WELLSense Duct sensor combines up to nine environmental sensors in a robust, in-duct solution designed for precise monitoring and compliance with global standards.

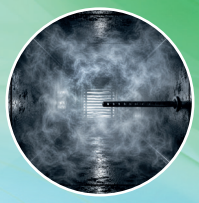

KEY FEATURES

Monitor 8 key parameters to comply with WELL and Reset Standards.

In-duct installation for accurate and representative air measurement.

Rugged design built for HVAC environments.

APPLICATIONS

SUPPLY AIR DUCTS
Verifies ventilation effectiveness and increases fresh air when IAQ declines.

RETURN AIR DUCTS
Provides valuable information about overall building air quality.

OUTDOOR AIR INTAKE
Allows the BMS to compare indoor vs outdoor air quality.

AFTER FILTRATION
This verifies that filters are working correctly.

CRITICAL AREAS
Ideal for areas with higher health or operational requirements.

COMMUNICATION

Seamless integration via Modbus and BACnet.

Modbus BACnet
